

**BREAKING NEWS: The Public Service Commission of New York (PSC) has accepted NYRI's application as complete.**

Two forums for public comment will be held: one in Oneonta on October 21 and one in Utica on October 22. Additionally, public comment may be submitted in writing, by telephone, or thru the web. The PSC note below contains details on meetings and submitting comments.

**STOP NYRI calls for a huge turnout at both of these meetings and an equally large written response from citizens.**

***Just because NYRI's application has been deemed "complete" does NOT mean the PSC has approved it!***

All it means is that NYRI has finally – after three attempts – managed to submit all the information the PSC requires before they can review it.

The completed application is available at public libraries throughout Central New York, so go to your local library – see for yourself how little regard NYRI has for YOUR land, YOUR farm, YOUR family, YOUR wellbeing, YOUR FUTURE.

NOW, more than ever, it is critical that each and every one of us step up and let the PSC know precisely why NYRI's proposed power line is a very bad plan for Central New York.

Please attend public forums, write a letter or go to the website and submit your comments or call the PSC directly.

***But whatever you do, AVOID DOING NOTHING!*** Because doing nothing is exactly what NYRI is banking on!

***Make your voice heard, so that collectively we make a great noise in opposition to this horrendous threat to OUR homes, our farms and our future.***

Visit [www.nyri.info](http://www.nyri.info) for more information on STOP NYRI's continuing opposition to the power line project.
